Number and Operations - Fractions

Cluster	NYS P-12 CCLS	NYS Next Generation Learning Standard
<p>Apply and extend previous understandings of multiplications and division to multiply and divide fractions.</p>	<p>5.NF.3 Interpret a fraction as division of the numerator by the denominator ($a/b = a \div b$). Solve word problems involving multiplication and division of whole numbers and fractions.</p>

<p>Apply and extend previous understandings of multiplications and division to multiply and divide fractions.</p>	<p>5.NF.4 Apply and extend previous understandings of multiplication to multiply a fraction or whole number by a fraction.</p> <p>a. Interpret the product $(a/b) \times q$ as a parts of a partition of q into b equal parts; equivalently, as the result of a sequence of operations $a \times q \div b$. <i>For example, use a visual fraction model to show $(2/3) \times 4 = 8/3$, and create a story context for this equation. Do the same with $(2/3) \times (4/5) = 8/15$. (In general, $(a/b) \times (c/d) = ac/bd$.)</i></p> <p>b. Find the area of a rectangle with fractional side lengths by tiling it with unit squares of the appropriate unit fraction side lengths, and show that the area is the same as would be found by multiplying the side lengths. Multiply fractional side lengths to find areas of rectangles, and represent fracti8 240.29 3598004 1358.27 r</p>

<p>Apply and extend previous understandings of multiplication and division to multiply and divide fractions.</p>	<p>...previous understandings of multiplication and division by whole numbers and fractions.</p> <p>...non-zero denominator. For example, $\frac{2}{3} \times \frac{4}{5} = \frac{8}{25}$ and $\frac{2}{3} \div \frac{4}{5} = \frac{2}{3} \times \frac{5}{4} = \frac{10}{12} = \frac{5}{6}$.</p> <p>c. Solve word problems involving multiplication of a whole number by a fraction and division of a whole number by a fraction. For example, how much chocolate will each person get if 3 people share $\frac{1}{2}$ lb of chocolate equally? How many $\frac{1}{3}$-cup servings are in $\frac{2}{3}$ cup of raisins?</p> <p><u>Note:</u> Students able to multiply fractions in general can develop a general rule for multiplying fractions.</p>
